## **Preface**

Strengthening the quality of education can be realized through innovation and development of education. A model development in accordance with materials taught covers strategies, approach, and method implemented in the learning process. Various models have been developed as a trend to improve learning quality, including learning media, the integration of materials which fit to the learning condition, long-distant learning, and a web-based learning. This international seminar on education discussing innovation and development about education with concept or development implementation in education

This International Seminar on Education, a cooperation between the Postgraduate Program of the University of Muhammadiyah Malang Indonesia and Musa Asiah Foundation of Cambodia is intended to study any issues concerning with strengthening teacher professionalism through an interdisciplinary approach. This seminar is appropriate and can give some chances to share ideas useful for improving the quality of education.
